MECHANICAL PIPE ALIGNMENT CLAMP

Mod. ANTR M

The **MECHANICAL PIPE ALIGNMENT CLAMP** is an equipment for a perfect alignment of pipes, when you need to weld them under optimum conditions. The laying is obtained with an eccentric. The mechanical working of the clamp is suitable for pipes with small diameter and small thickness.

*Available diameters: from 2" to 20"
bigger diameters on request*

Free area for welding: 100%

Mechanical pipe alignment clamp for stainless steel pipes are available with stainless steel contact elements.
