HYDRAULIC PIPE ALIGNMENT CLAMP

mod. ANTR I

When it is necessary to work on pipes with big diameter and big thickness (usually very heavy), you need to operate with a hydraulic pipes alignment clamp with the required force.

The **HYDRAULIC PIPE ALIGNMENT CLAMP** allows a perfect alignment of the pipes to be welded and it removes probable ovalizations, Infact sometimes ovalizations occur and they cause considerable waste of time.

*Available diameters: from 18" to 64"
smaller diameters on request*

Free area for welding: 100%

Hydraulic pipe alignment clamp for stainless steel pipes are available with stainless steel contact elements.
